Vasiliy Alabugin

Department Lead - Software Engineer

SUMMARY

I lead an egineering department working on data-intensive backend systems.

I am interested in advanced programming approaches and software reliability.

EXPERIENCE

Scala Department Lead at Evolution, Netherlands - 2024-Present

- Leading multiple distributed development teams
- Delivering innovative products and promoting engineering excellence

Software Engineer at Evolution (Estonia, Georgia, Netherlands)- 2022-2024

- Developed systems with Scala using Cats, Akka, Tagless Final, and event sourcing
- Delivered innovative solutions for technical compliance

Software Engineer at Tinkoff Bank, working remotely, Russia — 2020-2021

- Developed new banking services in Small and Medium Enterprise department
- Scala, Cats, Akka. Microservices, GitLab CI/CD, TeamCity, Docker, Linux

Software Engineer at RAMAX Group, working remotely, Russia — 2018-2020

- Developed internal software for national airlines and construction companies
- Scala, Kotlin, Ruby. Hardware maintenance. Linux systems, RedHat OpenShift, Postgres, proprietary software (IBM, Oracle) administration. Ansible, Jenkins, shell scripting. OCR and ML models development with Python

EDUCATION

Computer Science and Data Science, Bachelor degree
Innopolis University, Russia, 2016-2020

MY OTHER ACTIVITIES

I mentor bootcamp students, give lectures at company events, participate in hackathons and CTF competitions.

SKILLS

Most of my production experience is with Scala (using Cats and Akka), Kafka, Postgres, Linux, Jenkins, and Kubernetes. I am familiar with a few other languages and tools and I am always eager to learn new ones.

LANGUAGES

I speak Russian and English.
